Information about the coronavirus/COVID-19

Dear business partner,

We view the dynamic development around the coronavirus (Covid-19) from both a human and business perspective with concern, attention and prevention. A daily reassessment of the situation is necessary and long-term valid statements are difficult to make.

Nevertheless we would like to inform our customers and partners about the maintenance of the supply chain at Harmonic Drive SE. According to the current state of knowledge, we can meet your requirements without any restrictions.

We continue to closely follow the developments around the corona virus and their effects and will inform you immediately if the supply availability of our products is affected in the future.

Kind regards,

HARMONIC DRIVE SE
